PROFESSIONAL PROFILE

Ambitious and results-driven Artificial Intelligence and Data Science undergraduate with a comprehensive technical foundation in Python, C++, Data Structures and Algorithms, and Object-Oriented Programming principles. Proficient in web development using HTML5, CSS3, and JavaScript to engineer structured, highly intuitive, and responsive frontend interfaces.

PROFESSIONAL EXPOSURE

Web Development Intern

Emglitz Technologies

- Worked on website structure, styling, and navigation.
- Gained practical knowledge of web development and UI design.
- Tested web pages and fixed basic errors to improve functionality.
- Collaborated with the development team to understand project requirements and follow timelines.
- Gained exposure to basic version control and browser developer tools for debugging.

PROJECT HIGHLIGHTS

College Management Chaos

Project Architect

- Shaped the project from concept to a structured technical solution as Project Architect.
- Leveraged Claude AI as a development partner to brainstorm solutions, refine workflows, and design module structures.
- Defined the application architecture, connected components, and created a clear, scalable project flow.

Mini Ludo Game

FOP Python

- Developed a console-based Mini Ludo Game in Python using core concepts like loops, conditional statements, functions, lists, and the random module.
- Designed a complete turn-based gameplay engine featuring dice rolling, board state management, player mechanics, and winning conditions.
- Implemented input validation and live score tracking, applying clean modular function structures for easy future upgrades.

Terminal Snake Game

Python

- Built an interactive terminal-based Snake Game in Python, leveraging real-time event loops, conditional logic, and list operations.
- Programmed real-time snake movement, dynamic direction controls, food generation, and precise collision detection mechanics.
- Implemented dynamic score tracking and automated game-over state resets, ensuring smooth continuous gameplay execution.

ACADEMIC BACKGROUND

B.Tech - Artificial Intelligence and Data Science

CMS College of Engineering

CGPA: 8.18

2023-2027

Anna University

HSC

SPK Matric Higher Secondary School

70%

2021-2023

Higher Secondary Education

SSLC

MMB Memorial Matriculation School

80%

2019-2021

Secondary Education

PROFESSIONAL CREDENTIALS

- **Web Development Internship Certificate:** Completed internship at Emglitz Technologies, gaining practical experience in web development workflows, frontend architecture, and responsive application design.
- **Cyber Security by Google:** Acquired foundational knowledge in cybersecurity principles, threat mitigation, network security concepts, data privacy regulations, and digital security best practices.
- **Computer Vision Workshop:** Learned core image processing techniques, feature detection algorithms, and real-time visual data analysis, gaining practical exposure to AI-driven computer vision systems.
- **Programming in C++ with OOPS:** Mastered object-oriented programming concepts including inheritance, polymorphism, encapsulation, memory management, and algorithmic problem-solving techniques.
- **CODEZAP 2026 - The Flagship Intercollege Hackathon, Touchmark DeScience:** Participated in a competitive intercollege hackathon, collaborating with a team to design and pitch innovative technical solutions under time constraints.
- **Paper Presentation - AI Chatbot and Machine Learning:** Presented a research paper on AI chatbot architectures and machine learning techniques, strengthening research and technical communication skills.

TECHNICAL EXPERTISE

- Proficient in Python, Java, HTML, CSS, SQL, and MySQL, with hands-on experience in web development and database management.
- Familiar with Data Analysis, Machine Learning, Data Visualization, Git/GitHub, API Integration, and responsive web design.
- Skilled in building structured, intuitive, and responsive frontend interfaces using HTML5, CSS3, and JavaScript.
